

Calcium Gluconate Gel 2,5%

Tub 500g / Tube 40g.

Emergency First Aid treatment for Hydrofluoric Acid burns on the skin.

Only for external use. Must NOT be used in open wounds or in the eyes. Keep away from children's reach.

Storage between 8°-25° C. Do not use after expiry date.

Single-use product. Package that is opened or used shall be disposed of.

Instruction:

- Remove contaminated clothing, protect your hands with suitable gloves.
- Flush the skin thoroughly with lots of water for maximum 1 minute, or with alternative decontamination fluid.
- Generously apply Calcium Gluconate Gel on and around the exposed skin area and massage it into the skin for at least 15 minutes after the pain has vanished. Apply more gel if the pain reoccurs.
- Seek medical advice. The treatment can be repeated on the way to the hospital.
